**BUZZARDS BAY SAIL AND POWER SQUADRON**  
*presents*

**ON THE WATER TRAINING**

- *Do you fear docking your boat?*
- *Do you think it is much easier to parallel park a car than dock a boat?*
- *Do you have trouble leaving a dock with wind pushing you?*
- *Is it a mystery why your boat behaves like it does?*

This 8-hour program is the perfect combination of introductory classroom training followed by hands-on on-water practice - with expert instructors.

You'll learn how a boat responds to your controls and external factors such as wind and current. Animation and video clips help you visualize maneuvers prior to doing them on the water.

It covers the use of lines, departing from a dock, operating in a fairway, pivoting, mooring, backing, docking, steering, slalom, holding course, running a range, and stopping quickly.

**JUNE 6**      **live, interactive, on line seminar 6:30 – 9:00 PM**  
**Monday**    **Boat Handling / Control / Limited Spaces Part 1 of 2**  
**JUNE**        **7; 8; 9; 13; 14; 15; 16      On Water Training**

## **AMERICA'S BOATING COURSE**

America's Boating Course (ABC) is recognized as one of the very best ways to prepare yourself for boating.

ABC meets NASBLA certification requirements, is recognized by the U.S. Coast Guard, and **meets MA requirements for boat operation by 12-15 year-old boaters.**

ABC covers the basics of operating a boat safely, including rules of the road, aids to navigation, required equipment, and boat handling techniques.

**Each class is a live, interactive, virtual presentation on 4 weekday evenings followed by a "drive in" in-person, proctored exam given the Sunday following the last class.**

<b>September</b>	<b>THURSDAYS</b>	<b>6:30PM – 9:00PM</b>
	<b>APRIL</b>	<b>7; 14; 21; 28</b>
	<b>EXAM</b>	<b>SUNDAY MAY 1</b>

**ATTENDANCE ALL 4 DAYS PLUS THE EXAM IS REQUIRED**

**COST: \$65 per student**

You will receive a copy of the USPS ABC book, a summary of MA boating laws, and a US Coast Guard safe boating guide prior to the class.

**PRE REGISTRATION IS REQUIRED**  
**A PRE COURSE ASSIGNMENT NEEDS TO BE COMPLETED**  
**WE MUST MEET BEFORE THE CLASS TO DISTRIBUTE COURSE MATERIALS**

**TO REGISTER:** Send a completed registration form\* along with a check made payable to "Buzzards Bay Sail & Power Squadron" to:

## The View

Now that Spring is officially here, it's time to start getting ourselves and our boats ready for the season ahead. BBSPS is offering a batch of neat programs from evening seminars to full courses and on-water training in the coming months.

We attended the Spring District Conference in New Bedford and I presented a session on **What's New in Electronics**. If you are interested, I would gladly repeat the presentation on Zoom in the coming month.

The big news at the conference was presented by our new Chief, Craig Fraser. A team was formed last year to recommend a reorganization of USPS. Their plan was approved at the annual meeting and is underway with a projected completion by June of 2023. Simply put, we presently have a complex three-tier structure. To simplify, the district level will be officially eliminated. This means the squadrons (now considered "clubs") will interact directly with the national organization. We are free to form a consortium of squadrons to cooperate, but there will be no formal reporting structure. A lot of other changes to simplify the overall structure are being considered. A great deal of the plan derives from the results of a member-wide on-line poll last fall.

Dick Moore has announced a wide-ranging set of programs for Spring and early Summer. We are emphasizing boat handling, navigation, and using equipment. We have a great number of new members and still many people are moving into (or returning to) boating and want to build their skills. That's what we are here to do.

We will continue our live, online, virtual sessions interspersed with selected face-to-face meetings for hands-on training.

On April 9<sup>th</sup>, we will be meeting at the Holiday Inn in Falmouth for a social event and presentation on steam boats and related equipment. We also will perform our annual change of watch in a brief session.

By the way, BBSPS was awarded 2<sup>nd</sup> place in 2021 membership growth nationally at 16.7% in our squadron size group. Congratulations all!

Sign-up for some of our activities and let's get together to prepare for boating.

Best regards,

Bob Sweet

EDUCATION REPORT  
MARCH 2022

ABC classes

Our first ABC class will be in March 2022. We will offer a total of 8 ABC classes, one per month through October 2022.

March		7 students	Bob Sweet / Dick Moore
Thursdays	10; 17; 24; 31	exam Sunday April 3	
April			Bob Sweet / Dick Moore
Thursdays	7; 14; 21; 28	exam Sunday May 1	
May			Bob Sweet / Dick Moore
Thursdays	5; 12; 19; 26	exam Sunday May 29	
June			Bob Sweet / Dick Moore
Thursdays	2; 9; 16; 23	exam Sunday June 26	

Seminars

Bob Sweet / Dick Moore

Our 2022 Seminar Series will begin on March 7. As we did in 2021 these will all be presented using a live virtual format which allows for the participants to ask questions and discuss the topics with the presenters. Join us!! The great thing about seminars is that you learn a lot and there is no homework or exam!!

April

11 & 18	Monday	Boat Handling 2 parts
25	Monday	Nautical Rules of the Road & Ropes

May

2 & 9	Monday	Basic Coastal Navigation 2 parts
3	Tuesday	New England / Cape Cod Weather
10	Tuesday	Trailer a boat
16 & 23	Monday	Boat Handling 2 parts
24 & 25	Tues./Wed.	Boating & Navigating with Electronics 2 parts
31	Tuesday	Nautical Rules of the Road & Ropes

June

8 & 15	Wednesday	Basic Coastal Navigation 2 parts
13	Monday	Nautical Rules of the Road & Ropes
22	Wednesday	Advanced Anchoring

On Water Training / Boat Handling

June

6	Monday	on line seminar / boat handling limited spaces
7-9; 13-16		On Water Training by appointment
20	Monday	on line seminar / boat handling open water

Marine Electrical Systems

7 students Dick Moore

This is the first of three USPS courses on boat electrical and electronic systems and covers the wiring of your boat and its systems.

Tuesday Evenings March 15; 22; 29 April 5; 12; 19; 26

Engine Maintenance

10 students Dick Moore

The course has completed and the exams have been sent to USPS for grading.

Weather

7 students Dick Moore

CONGRATULATIONS! To the following members who successfully completed the Weather course: Michael Casso; Janet Simons Folger; Rooster Fricke; Patti Keating; John Lansing; Cathy Sampson; Wayne Sampson

Coastal Navigation (P + AP)

4 students Bob Sweet / Dick Moore

We've combined the two USPS courses Piloting and Advanced Piloting into one complete Coastal Navigation program. You learn how to effectively use charts, GPS, and a chart plotter to safely plan and navigate, how to check your navigation, and what to do if there is a problem.

The students have completed both the Piloting and the Advanced Piloting parts of the course. They are working on the Advanced Piloting exam.

CONGRATULATIONS! To the following members who successfully completed the Piloting course: Rooster Fricke; Fernando Rodriguez

Instructor Development

1 student

Dick Moore / Bob Sweet

This course focuses on how to teach adults using a modern, interactive and fun approach to learning. Students who complete the course will become certified USPS instructors prepared to teach USPS boating classes.

Our 2022 offerings are all planned using a live “virtual” presentation followed by individual in depth sessions with each student as necessary. We are striving to bring our members and the boating public high quality, comprehensive, boating education opportunities. Look at our schedule of classes and seminars and join us....learn something.....have fun..... and have some person to person interaction, even though in a virtual format.

Respectfully submitted,

Richard Moore SN IN  
Education officer

## Looking Around – On the Water

### Bob Sweet

The marine industry is moving to new technologies to help us on the water. A lot of it involves video. As a boater, you literally need your head on a swivel to watch all directions, spot other boats, and ease up to the dock. These new tools will work with your chartplotter display to make your job easier.

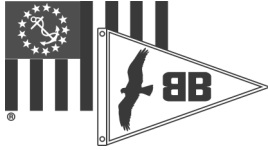

Let's begin with simple cameras. These obviously need to be tailored to the marine environment, but they perform much like cameras you may use at home. Most chartplotters and multifunction displays can show video from these cameras. There are two types – wired and wireless. Obviously, wireless makes for somewhat easier installation, but you still need power to the cameras.

So, where do you put cameras? For view underway, you would like to see astern of the boat with a relatively wide field of view. For docking, you want cameras looking downward along the sides and stern of the boat. Some cameras have pan and tilt so they can be steered; otherwise, you may need several cameras. Typical cameras cost between \$175 and \$750.

So much for just looking at a video screen, a number of companies have added some smarts. For example, Raymarine has a system they call Clear Cruise®. You get a special camera and a control box. Connect this to your Axiom display and magic happens. Let's assume you also have an AIS receiver or transceiver as well. Then, with the camera facing forward, its stabilized image is shown on the display with identifying tags over the boats with their AIS identities shown. Their respective distances are also shown. In addition, you can have your waypoints tagged on the screen. Same thing for buoys that have AIS identities. This rig will set you back about \$1500.

Let's say you boat at night and want to stay safe. Your best bet is a FLIR camera. These cameras sense infrared – in other words, they see heat rather than visible light. That is perfect for boating, even with no ambient light around. A pan-and-tilt adjustable camera with zoom lens is a bit costly at around \$3500, but you can't beat the performance. FLIR is the company that owns Raymarine, so they make a great pair. As an alternative, you can get a handheld FLIR monocular for about \$2500.

If you are really concerned about docking and have an expensive boat, you might want an even more sophisticated system. Raymarine offers DockSense® and Garmin offers SurroundView®. These systems use multiple cameras to create a "bumper" around the boat so you see exactly where you are relative to the dock or other obstacles. These are more or less factory installed systems costing as much as \$18,000. But it may be worth it to ensure your multi-million-dollar yacht doesn't crash into a dock. Nobody said this is an inexpensive sport!
